

Dashboard

Overview

Metric One Dashboard for Onyx Employee Portal (OEP) extends the power of the Onyx OEP client by providing a feature-rich interface for creating charts and linked lists from standard OEP List Manager queries.

The ability to drive up to six Dashboard “POD”s from any saved List Manager query gives each user endless reporting and listing capabilities.

Features

- Simple “Plug and Play” installation into your existing Onyx Employee Portal system
- Up to 6 separate Dashboard PODs can be configured for each individual OEP user
- POD customization is accomplished through an easy to use, form based user interface. No coding by the OEP user is ever required
- Numerous POD configuration options, including:

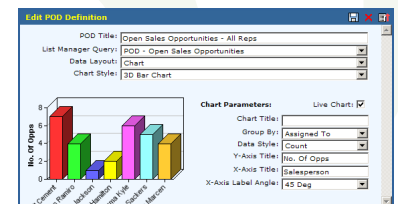

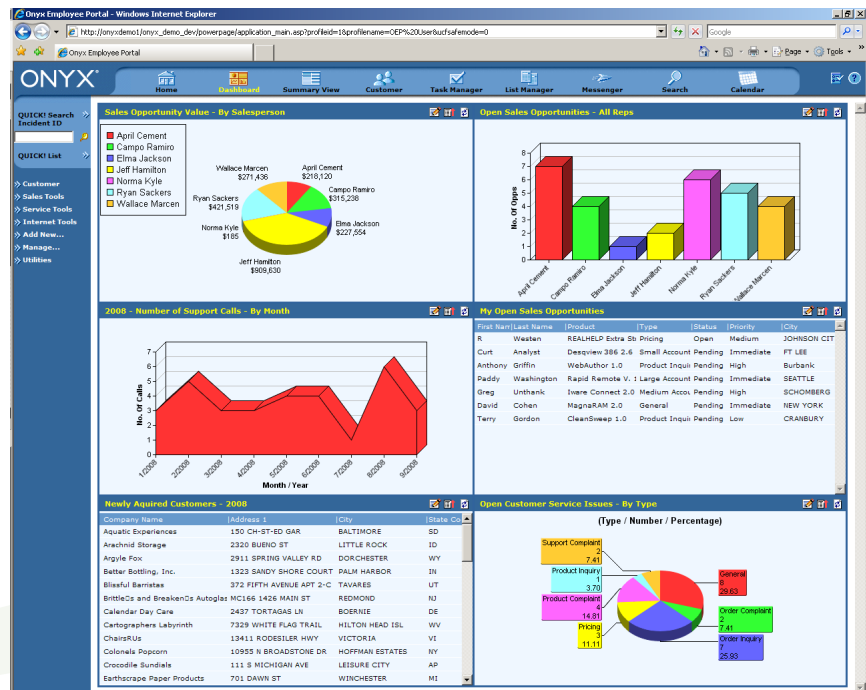

Charting - Standard & 3D:

- Pie Charts
- Bar Charts
- Line Charts
- Area Charts

Linked Lists:

- Linked Company Lists
- Linked Individual Lists
- Linked Incident Lists

- List Manager query support includes standard and custom SQL List Manager queries
- Each POD is expandable full-screen for improved viewing
- Access to the Dashboard interface can be controlled in OES Security Administration through the use of standard Role & UI Resource security

Benefits

Incorporate a true “Executive Dashboard” into your Onyx OEP application for the Managers and Executives in your organization

Give select users across your organization the power to manage their data at a glance, in a robust easy to view interface
